

READING MULTIPLE CHEMICAL ARRAYS

5

ABSTRACT OF THE DISCLOSURE

A method, apparatus and computer program products relating to the reading of chemical arrays and extracting feature characteristics therefrom. In a method multiple chemical arrays each having a plurality of features, are read to obtain array signal data. The array signal data for the multiple arrays is saved in a memory. The saved signal data for chemical arrays is retrieved from the memory and feature characteristics extracted therefrom, wherein the saved signal data for a chemical array is extracted while another chemical array is being read.
